

How to prepare for a Brazilian Bikini Wax

1.If you are very sensitive in that area take an Advil 30 minutes before.

2.You should trim you hairs to about 2cm or less (but leave enough for the wax to hold on to).

The French bikini wax also known as the modified bikini wax.

The French bikini wax leaves a narrow line in front (upside down triangle design)

With the French Bikini Wax all the hair will be waxed off far between the inner Labia, but not all the way to the buttocks. If you would like the full buttocks area waxed then that is called a Brazilian Bikini Wax.
