

## Features

- 1.5  $\mu$ L sample volume
- 3 minutes test time with no hands-on
- Reliable results

## Afinion™ CRP

Simple ■ Fast ■ Reliable

- 1 ..... Specially designed sampling device ensures easy and safe sample collection
- 2 ..... Barcode includes calibration and lot specific data - no user calibration necessary
- 3 ..... Fully enclosed testing environment increases user safety

### Intended use

Afinion™ CRP is a rapid test for quantitative determination of C-reactive protein (CRP) in human blood. CRP measurement is valuable in diagnosing and monitoring of infections and non-infectious inflammatory diseases.

# Afinion™ CRP

Simple ■ Fast ■ Reliable

## Why measure C-reactive protein?

A significantly increased CRP result may indicate the need for immediate antibiotic treatment. The CRP level decreases rapidly in response to effective therapy.

A normal or moderately increased CRP may support a diagnosis of viral or self-limiting bacterial infection, which provides valuable information to prevent unnecessary antibiotic prescriptions.

## 3-step procedure

## Facts

- Accurate whole blood measurement with automatic hematocrit correction
- Excellent correlation with laboratory methods
- Good precision in the total measuring range of 5-200 mg/L
- 6 weeks room temperature storage
- Ready to use Controls in 2 levels

## Other available tests

Afinion™ HbA1c and Afinion™ ACR (albumin/creatinine ratio)
